

I AM NCR ALOHA MOBILE

The power and flexibility of Aloha in the palm of your hand

It's no secret. Aloha users are passionate about the ease-of-use, redundancy and flexibility built into their Aloha systems. Now we are giving you the capability to extend the value-added features of Aloha to a mobile device, Aloha Mobile. Available today on NCR's next generation handheld device and iOS for Apple® consumer devices, you can choose what hardware devices you want to use to deploy mobile ordering and payment technology. Your employees will have a seamless experience with the same user interface and workflow, regardless of the hardware platform.

Choose the hardware platform that works for your business

Every business is different. With Aloha, you now have the choice to use traditional POS terminals, NCR's built-for-purpose handheld device and/or iOS devices within the same location.

Increase consumer engagement and satisfaction

Your business revolves around putting the customer first. Aloha Mobile enables your servers to spend more time with their guests resulting in better service, increased order accuracy and consistent upselling.

Increase your table turns

With Aloha Mobile, the order-to-service cycle runs more quickly, enabling you to serve guests faster and shorten wait times to keep potential guests from walking out. Orders are more easily communicated from the guest to the kitchen or bar in a single step.

Create and maintain the loyalty of your staff

Happy employees can make or break your business. Servers that use Aloha Mobile give better service, resulting in increased tips and a stronger attachment to the customer and the restaurant.

Why NCR?

NCR Corporation (NYSE: NCR) is the global leader in consumer transaction technologies, turning everyday interactions with businesses into exceptional experiences. With its software, hardware, and portfolio of services, NCR enables more than 485 million transactions daily across retail, financial, travel, hospitality, telecom and technology, and small business. NCR solutions run the everyday transactions that make your life easier.

NCR is headquartered in Duluth, Georgia with approximately 29,000 employees and does business in 180 countries. NCR is a trademark of NCR Corporation in the United States and other countries.

The power of combining Aloha Mobile and the NCR Orderman7

Protect consumer payment card data

The Orderman7 mobile device is validated against the Payment Application Data Security Standard (PA-DSS). Servers can accept and process secure credit card payments tableside, keeping the consumer payment card in guest view at all times and reducing the risk of skimming by the employees.

Easy return to service model

Exchange replacement units "on the fly" by simply swapping out the SD card from the device with a problem and insert it into the replacement device.

Leverage optional RFID technology to increase speed of service

The Orderman7 has RFID technology built into the device that your servers can use to increase speed of service and amaze your guests.

Tap to open a table

Install RFID tags on tables in your restaurant to enable your staff to easily open a check by tapping the Orderman7 device near the table.

Tap to print

Using specially designed printers, servers can walk up to a printer, tap the Orderman7 device on the printer, and a receipt is immediately printed. Strategically place printers throughout the restaurant without the need for an attached POS terminal.

Flexibility and choice

For those operators who want to use a commercial hardware platform, NCR Aloha Mobile is also available on the iOS platform. Operators can use iPads, iPad minis, and iPod Touch/iPhone devices to run Aloha Mobile. The ultimate in flexibility—if desired, Aloha Mobile can be deployed on both hardware platforms in the same location.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
